DS1000/2000 TECHNICAL TRAINING VIA THE INTERNET!

Volare™ Distance Learning

Get your NEC DS1000/2000 training via the Internet in the comfort of your office or home with Volare™! If you have a multimedia PC with access to the Internet you may qualify for admittance to Distance Learning classes.

Objective:

Students will be able to install, program, maintain, and troubleshoot the DS2000 system to the printed circuit board level.

Prerequisite:

Knowledge of basic telephony terms, Key system operation, and Centrex/PBX operation.

Course Description:

DS2000 installation, programming, and troubleshooting. The course is divided into two 4 hour live training sessions via internet conference. Visual and voice presentations are delivered to mirror a live classroom environment.

Materials:

NEC manuals and course materials provided for course
Electronic documentation available.

Price:

Only \$100.00 per student.

Please contact Michele Onidi, UBSD Training Coordinator at 203-926-5460 for more details!
