DS1000/DS2000	Prior to 03.10.08

Title: IntraMail Upgrade Notice with DS-Series

IntraMail Upgrade Notice

When upgrading from 03.xx.xx software prior to 03.10.08, the options in Programs 8005, 8006 and 1808 will be lost.

The **DS2000** will initialize during an upgrade so it is necessary to save and restore the database. If you backup and restore using a database flash card when upgrading from 03.xx.xx software prior to 03.10.08, the options in **Programs 8005, 8006 and 1808** will be lost. To avoid having to reprogram these options, use the DS1000/2000 System Administrator to backup and restore the site database.

The **DS1000** will attempt to retain the database when upgrading, however, when upgrading from 03.xx.xx software prior to 03.10.08, the options in **Programs 8005, 8006 and 1808** will be lost. To avoid having to reprogram these options, use the DS1000/2000 System Administrator to backup and restore the site database.
