**Title:** UltraMail / Aspire Mail Admin Programming Information

---

Keep the following information in mind when using the Admin program with the UltraMail or Aspire Mail .

1. The Admin program is single-session. If the system is being programmed locally (through the serial port or LAN connector), it cannot also be programmed remotely.
2. If the Line Editor mode is left active (even if a HyperTerminal session is not connected), remote programming is disabled.
3. Remote programming via the Line Editor is not available. Remote programming is only available through the Admin program.
